PATENT TRADEHARK OFFICE

The undersigned inventors believe the original patent, U.S. Patent No. 6,080,553, to be partially inoperative by reason of claiming less than the undersigned had a right to claim. At least one error is now apparent to the applicants. With respect to the originally issued claims 1-23, these claims recite a creatine amidinohydrolase, reagent, method of production thereof, and method of use thereof. The creatine amidinohydrolase is defined by the specific physicochemical properties of action, optimum temperature, optimum pH, Km value, molecular weight, and isoelectric point. It is the belief of the undersigned that the present invention encompasses a creatine amidinohydrolase defined by the physicochemical properties such as action, heat stability, and Km value, but not necessarily isoelectric point. This error and any other errors (i.e., all errors) were made without any deceptive intent on the part of the applicants and were discovered only recently, during a review of the patent claims after the issuance of the patent. To rectify the errors, the original claims 1-23 have been deleted. Independent claims 24, 25, 33, and 35-37 reciting a creatine amidinohydrolase have been added. Finally, the applicants have also included dependent claims 26-32, 34, and 38-42, which more precisely define and describe the preferred creatine amidinohydrolase, reagent, method of production thereof, and method of use thereof.

I declare that all statements made herein of my own knowledge are true, that all statements made on information and belief are believed to be true, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
